

Boudewijn Deuss. EASA Senior Regulations Officer - Initial Airworthiness

Since the beginning of 2016 project manager of the GA Roadmap project.

Boudewijn Deuss started working at EASA early in 2005 in the Rulemaking Directorate. From the start engaged in the development of airworthiness rules and technical standards for all kinds of aircraft ranging from Hot-Air balloons, sailplanes to the upper end of business aircraft. At the same time being responsible as rulemaking focal point for Part-21 Production Organisation Approval regulations.

Before working at EASA at Fokker Aircraft in the Netherlands in various posts (Engineering, production, after sales technical support and Continuing Airworthiness documentation) that primarily required a liaison role between various parties.
